

**PROFILI DECORATIVI
DECORATIVE PROFILES**

La nostra Azienda

Da oltre 20 anni si occupa della produzione di articoli in marmo agglomerato ed è arrivata a distinguersi per la realizzazione innovativa e tecnologicamente avanzata del Marlux®, superando logiche e vecchi schemi.

Fin dagli esordi ha impostato la sua filosofia sull'affidabilità e sulla qualità del prodotto, caratteristiche che ne hanno fatto un riferimento nel settore dell'arredo bagno e dell'edilizia decorativa.

Our Company

Tecno-Marble has been dealing with the production of articles in agglomerated marble for more than 20 years and has come to distinguish itself for the innovative and technologically advanced realization of Marlux® surpassing all logical and old outlines. Since the very beginnings our company has chosen reliability and quality of the product and these characteristics are a reference mark both in the bathroom fittings and in the decorative building.

Il Materiale

Marlux® è composto da polveri e granuli di marmo naturale e resine che permettono la realizzazione di diverse versioni di superfici e colori.

La non porosità che caratterizza il Marlux® lo rende inassorbente, igienico e facile nella pulizia.

The Material

Marlux® is made of powders and granules of marble and resins which allow the realization of different kinds of surfaces and colours.

The non-porosity which characterizes Marlux® makes it non-absorbing, hygienic and easy to clean.

I Prodotti

Profili, elementi decorativi per interno ed esterno, battiscopa, doghe e pannelli da rivestimento. Resistenti, leggeri e facili da installare, realizzati in modo altamente tecnico, garantiscono stabilità e durata nel tempo. Adatti a personalizzare stilisticamente ogni progetto decorativo.

Disponibili in una vasta gamma di modelli e colori.

Questi articoli rappresentano una novità assoluta, dato l'utilizzo di nuovi marmi agglomerati in sostituzione ai tradizionali marmi naturali. La realizzazione di questi articoli sarebbe molto complicata utilizzando il marmo naturale, sia per i notevoli costi di lavorazione, sia per la difficile reperibilità del colore di marmo desiderato.

La diversità delle forme, rifiniture e colori dei marmi agglomerati valorizzano gli ambienti in cui vengono esposti.

The Products

Profiles, decorative elements for inner and outer. Skirting-boards, staves, facing panels.

Resistant, light and easy to set up, produced in a greatly technical way they guarantee stability and length. Suitable to personalize stylistically every decorative project. Available in a wide range of models and colours.

These articles are an absolute novelty, due to the use of new agglomerated marbles instead of traditional ones. The realization of these articles is very complicated if you choose to produce them with traditional marble, whether for the considerable expense of manufacture or for the difficulty to find the desired colour of the marble. The difference of the shapes, finishings and colours of the agglomerated marbles bring out the spaces where they are exposed.

Colori Standard

Standard colours

Il Marlux® è disponibile in 5 colori standard ma può essere anche realizzato in altri colori.

Istruzioni per il montaggio

Pulire le parti polverose sia al muro di supporto che nella parte interna del manufatto.
Per avere una massima garanzia dell'ancoraggio si consiglia di usare del collante per piastrelle o silicone.
I suddetti collanti possono essere forniti dalla nostra ditta.

Instruction for settings

Clean the dusty parts both at the wall and in the internal part of the manufactured product.
In order to obtain a good anchorage you should use cement for tiles or silicone.
Cements can be supplied by our factory.

Avvertenze

Le misure possono avere una minima tolleranza.
Per i colori si può assicurare una notevole somiglianza ma non una perfetta uguaglianza alle illustrazioni.
Per quantità si può considerare la produzione di modelli e colori su richiesta.

La Tecno-Marble si riserva di apportare modifiche senza preavviso: di misure, pesi e materiali che migliorino il prodotto.

Notes

Measures may have a minimal tolerance.
Colours guarantee a notable similarity but not a perfect equality with respect to the illustrations of the depliant.
For quantity we can produce models and colours on request.

Tecno-Marble reserves to introduce changes without notice for measures, weights and materials that improve the product.
